MERKABA-HEIROPHANT

In order to collect these frequencies from other dimensions into our body so that we can RAISE FREQUENCIES into the state of Ascension, we use a Heirophant. A Heirophant is a symbol that was given a Divine Power by its creator. This Heirophant has the power to bring the 12th Dimensional Christ Frequency into our Temple or our Body to restore Christ Consciousness. All other Frequencies can be collected into the Crystal Temple through this Christ frequency heirophant.

The male and female metatronic symbols- the male triangle pointing up and the female triangle pointing down is the symbol of the original divine blue print. The spiritual body that contains the crystalline structure of Immortality.

Merkaba is one triangle pointing up and one triangle pointing down.

Try to see or feel the triangles intersecting or overlapping their energies in order to create the spin. The Triangle pointing upward is the electro and it spins clockwise. The triangle pointing downward is the magnetic and it spins counter clockwise. We use the merkaba spin rate of $331/3$ electrical of the $112/3$ magnetic spin to align all cells into the 12 DNA divine code. We have the power to direct the correct spin of the merkaba by just saying merkaba spin correctly now and feel the rhythm of the spin in your body. It actually has a rhythmic beat of spin that is felt in the body.

We can also give the command Rasha Eira Christ Star Now.

MERKABA BODY / GOLDEN MERKABA & MERKABA VEHICLE

There are basically two types of Merkabas that we deal with as individuals. For many years the Merkaba has been described as a 27' foot radius crystalline structure around the body that is a part of your spiritual body that frequencies run through like an electrical conduit. That is accurate, but there are also 4 more Merkabas around the body that have come accessible to us since the ascension began in 2000. This 5 Merkaba is the Golden Merkaba and connects us to all of the Spheres and dimensions of Oneness in the universe and beyond.

The other type of Merkaba is one that we create to collect and distribute frequencies in meditation and that is called the Mekaba Vehicle. We will be using the Merkaba Vehicle often in meditations for collecting and distributing frequencies is a big part of the ascension process and a big part of life from now on as we quickly approach living in the New Earth Islands of Light.

The more detailed creation of the merkaba is the top triangle is the electro or male and it always spins at $33 \frac{1}{3}$ spin rate. The bottom triangle is magnetic and always spins counterclockwise at $11 \frac{2}{3}$. These two parts can also be seen as the eiros and the ethos. The Eiros is the spark of Source and the Ethos is the Etheric level.

The power of the merkaba is enormous. The spin rates of the two parts equals 90 degrees. It is the 90 degrees that tilts one reality field into another reality field. This is like going from one dimension to another or like flying from Earth to Tara.

The Merkaba is a little more complicated than that however. It actually takes 6 electro tops and 6 electro bottoms to equal the complete 12th dimensional reality transformation.

The meditations also utilize the science of what has recently been called Unified Field theory. It is the sacred geometry of this is to that as this is to that. In reality everything is a reflection of Source Consciousness -- not just a little -- bit -exactly. The This of Source Consciousness is to the that of the Cosmic Consciousness as the Cosmic Consciousness is to the Universal Consciousness, etc. And the Source Consciousness is to the Planetary Consciousness as it is to the Cosmic Consciousness.

So, when we use the merkaba, which spins three times the speed of light, we bring into our reality field through frequencies of consciousness the at one ment of Cosmic Consciousness to our bodies or at one ment with Universal Consciousness with our bodies. And each has a certain angle of rotation that carries the frequencies into the body.

When the body has activated enough light energy from the merkaba spinning correctly into the right places, the body can actually turn into light. It folds up into a sphere and blips into the new space time location that holds the frequencies that were held in consciousness before the blip. It happens in a thousandth of a nano second.

Manifestation takes place with the exact same merkaba mechanics. Even if the frequency of consciousness is a million dollars, it is the space and time technology of bringing that reality into the reality field that you are manifesting through the merkaba in.

When the body folds into the orb of light, it is just like a baby in a womb. Some of you have seen pictures of orbs taken at spiritual workshops. Those orbs are people- or entities. They are entities who know how to use the merkaba mechanics. All fifth dimensional entities know how to do this. You can't become fifth dimensional until you know how to become an orb.

So, we will all be Orbing to Tara soon. Some of us in 2017. So Orbing isn't such a far out phenomena once you understand the frequency mechanics to the level of feeling your body disappear. It is that feeling. It is raising your frequencies so high that you actually feel like you are in the place that you transferred your frequencies and your consciousness to. With more and more practice, the body actually orbs to that place in time and space.

So, that is what the Ascension Meditation and other Meditations are to be used for. Learning how to begin to activate your body through the Hierophant, the Crystal Star Vehicle, some call the Merkaba.

We are going to use the term Crystal Star Merkaba in this Website so that our technology is not confused with others.

The majority of the teachings out there in internet sites come from the Flower of Life Teachings. That merkaba mechanics is the exact opposite of this merkaba mechanics. The Flower of Life Mechanics will not tell you to spin the electro mechanic spin rates of 33/13 to 112/3. The Vesica Pisces and Fibonacci mechanics are Mortality Tools. They do not lead to Eternal Life.

The Crystal Star Merkaba Mechanics create Eternal Life, the return to the 12 DNA template of the Mind of God.

So, the Frequencies on the Ascension Meditation are the Frequencies that my breath creates when I'm connecting my Consciousness into Universal Consciousness or Source Consciousness, or the Frequency of the Helium or the Frequency of Sun Alcyone. When I create these frequencies I'm riding in the merkaba to the space and time of the energy that I want to retrieve, I place the frequency in the merkaba and then ride the merkaba to the place where I want to exhale the frequency.

We usually begin with the 12 dimensional symbol in the midbrain and then ride it down to the 13.5 dimension in the inner etheric core of the Earth. We call this place her Crystal Heart. We then ride the merkaba up to one foot under our feet or in the Earth's Crust. This is the 12 dimension within the Earth. Next, we spin the merkaba to connect the 13.5 frequency with the 12 frequency and spin them together to activate a shield of 12th dimensional Christ Consciousness

Protection shield around the body.

From that point on the body is protected from anything during the day that could harm it.

The merkaba is taken up to the 14th dimension to collect the heliotalic frequency. That is the frequency that is required to pull this Earth matrix back up into the Aquarius Frequencies. We connect the 14th dimension to Sun Alcyone which is hydro plasma. When hydro plasma and helium are mixed in the merkaba spin, we create Neutron Frequency. Now we ride the merkaba into the mid brain and fill it full of this neutron frequency to begin the transformation of the chemical structure of the body.

These are some basics of the merkaba mechanics. If there are enough people who actually want to sign up and pay for actual classes, I will direct your study of these mechanics.

Independent study can be arranged for telephone calls of one half hour per week to guide in personal ascension mechanics.

CRYSTAL

MANIFESTATION

MEDITATION

The formula of co-creation requires announcing the incoming light into every

cell in your body. It is a time to remember, to re-cognize, to realign the

entire structure of the mind and the body into the frequencies of light that are in the dimensions of our selves that we have not yet allowed to become a part of our lives.

Each crystal cell in our body must be completely full of all of the breaths

of Cosmic Consciousness from every dimension.

We must announce the light into the crystal cells in our bodies. He did not

say the angels would announce the light. He did not say that the sun would announce the light. He said that we must announce the light into the crystal cells of the body.

We announce the light energy into the crystal cells through the Breath of Crystal Light Energy in our CD albums and meditation kits. We use the merkaba spin rate of 331/3 electrical of the 112/3 magnetic spin to align all cells into the 12 DNA divine code.

The corrected alignment of every crystal cell in the heart, the brain area and the breath to be filled with the complete spiritual essence of the dimensional frequencies of the 12th dimensional Christ Consciousness, the 13th dimensional frequencies of the Earths Crystal Core Domain, the 14th dimensional frequencies of the etheric realms and the 15th dimensional frequencies of the co-creative realm.

SPHERES

AND SELVES

MEDITATION

There is an aspect of our selves as ourself in each and every dimension and Sphere all the way up to and including Source. We are in all the dimensions of our universe and beyond including our God Self and Source. All the dimensions and Spheres are always around us, we just need to be aware of them and start bringing in the frequencies.

Here is a meditation to help bring all of your selves into the forefront of consciousness:

It would be very good to also play the music which will facilitate this process from “Ascension Vortal” album or another of the Ascension Music albums that you like while doing this meditation to help you connect with your entire multidimensional self at all dimensions and Spheres at the same time.

Also, take a look at the Spheres and Selves diagram and know that there are specific frequencies where each of your selves hang out - Your Source self has the frequencies of Source, your Monad Self has the frequencies of your particular Monad, your 5th Sphere self has the frequencies of the 5th Sphere, your Christ self has the frequencies of the 4th Sphere, your Spirit (Over Soul) self has the frequencies of the 3rd Sphere, your Soul self has the frequencies of the Second Sphere. It is also important to realize that we are one with all of our selves now - we are not ever separate and never have been.

Sit in a comfortable position.

My breath is what helps further draw or move divine energy/frequencies. My inhale generally draws energy. My exhale

generally moves the energy. So, in this case, I inhale to draw frequencies into myself from a higher self and the corresponding dimension that part of me resides in and I exhale to move these specific frequencies into every cell of my body and out into the spin of my Merkaba - a part of my spiritual body that is in a 27' radius around me.

Before I begin, I thank Source for everything.

I then state, "I am Divine Mind, now." When I start to feel the energy, I inhale to accelerate the drawing in the energies and then I breathe the energies out my 3D body to saturate every cell. I repeat this until I feel the energies tingling throughout every cell. I then continue and exhale the energies out into my spinning Merkaba until I feel that it is super saturated with the energy.

Repeat

I then state, "My Source Self frequencies, now." When I start to feel the energy, I inhale to accelerate the drawing in the energies and then I breathe the energies out my 3D body to saturate every cell. I repeat this until I feel the energies tingling throughout every cell. I then continue and exhale the energies out into my spinning Merkaba until I feel that it is super saturated with Source energy.

After a while, you will clearly feel and know that your mind and the Lord God of your Beings Mind are the same. This is what you want. And you will also feel the immediate connection all the up and down the dimensions and Spheres with yourself.

Important Note: it is very important to breathe the frequencies both into every cell of your body and into your Merkaba - for the frequencies that run through the Merkaba make it all the way to the body after a little while. The process of matching frequencies to create a portal or go to another dimension demands that your home body has the matching frequencies. Our consciousness can go all the way to Source at any time and at all times now, but we need to work on moving our home body to our new home of the 2nd Sphere, so we need to get the frequencies through our Merkaba and all the way down to every cell in our body.
